# FEATURED SPEAKER

## ASOPRS Foundation Ralph E. Wesley Lecturer: Katharine A. Phillips, MD

Saturday, June 13

12:16–12:59 pm

*How to Identify and Approach Patients with Body Dysmorphic Disorder*

Katharine A. Phillips, MD, is Professor of Psychiatry, DeWitt Wallace Senior Scholar, and Research Director for the Psychiatry Residency at Weill Cornell Medical College in New York City. She is also Attending Psychiatrist at New York–Presbyterian Hospital. Dr. Phillips graduated with honors from Dartmouth College and Dartmouth Medical School, and she completed her psychiatry residency at McLean Hospital/Harvard Medical School.

Dr. Phillips is internationally recognized for her research studies and clinical expertise in body dysmorphic disorder (BDD). Her research studies on BDD were continuously funded by the National Institute of Mental Health for more than 20 years. Her groundbreaking work has included identification of BDD's clinical features and morbidity, treatment studies, and development of screening, diagnostic, severity, and insight measures. Her work has also identified important aspects of BDD in cosmetic treatment settings.

Dr. Phillips has published more than 375 articles, chapters, and letters in scientific journals and books, and she has authored or edited 11 books, including multiple books on BDD.

Dr. Phillips has given more than 650 presentations around the world. She has received many honors and awards for her research, clinical work, and other academic contributions. Her awards for her research studies on BDD include a Special Presidential Commendation from the American Psychiatric Association and the 2023 Outstanding Career Achievement Award from the International OCD Foundation.

# GENERAL INFORMATION

## Symposium Objectives

- To provide a forum for presentation of new concepts, ideas, techniques, and research in functional and aesthetic reconstructive oculofacial plastic surgery
- To discuss current practice management techniques and coding methods, access to care, safety, and professionalism in oculoplastic surgery
- To illustrate new advancements in medical and surgical management of orbital and eyelid tumors and inflammatory conditions
- To provide an update on the advancing field of oculoplastic surgery
- To allow ample time for discussion with experts of oculofacial and reconstructive surgery in a collegial atmosphere

## Meeting Evaluation/CME Certificate

An evaluation will be provided to attendees after the meeting via email. You will have an opportunity to download a CME certificate once you have completed the evaluation. Your feedback is carefully considered when planning future meetings. Thank you for helping ASOPRS improve our Spring Scientific Symposium.

## Education Disclaimer

Registrants for this symposium understand that medical and scientific knowledge is constantly evolving and that the views and techniques of the instructors are their own and may reflect innovations and opinions not universally shared. The views and techniques of the instructors are not necessarily those of ASOPRS but are presented in this forum to advance scientific and medical education. ASOPRS disclaims any and all liability arising out the information presented in this meeting. Registrants also understand that operating rooms and health care facilities present inherent dangers and, as such, they shall conform to all proper medical practices and procedures for the treatment of patients for whom no medical history is available.

## ASOPRS Code of Ethics

## ASOPRS Accredited Continuing Education Policy and Procedure

# GENERAL INFORMATION

## Industry Disclaimer

ASOPRS is accredited by the ACCME to provide CME. During our Scientific Symposia, ASOPRS engages with Industry according to ACCME guidelines to provide attendees with informational opportunities in the form of Exhibits, Product Theaters, and Third-Party Satellite Symposia.

Product Theaters are events developed and controlled by companies that provide promotional content without offering CME. They are separate and distinct from the ASOPRS ACCME-accredited CME program.

Third-Party Satellite CME Symposia are events developed and controlled by an ACCME-accredited third-party provider. They are supported by grants from industry. The CME provided by these third parties is separate and distinct from the ASOPRS ACCME-accredited CME program.

ASOPRS does not verify the claims made by Product Theater or Third-Party Satellite CME Symposia companies or assess the information presented by them at our meetings. The acceptance of fees from and provision of space to these companies does not imply endorsement or recommendation by ASOPRS.

We encourage all attendees to exercise their own independent judgment regarding the advisability of engaging in any business transactions.

## Reporting to CMS

Product Theater companies are required to follow Centers for Medicare & Medicaid Services' regulations for reporting meals provided to attendees to Open Payments.

## Photography and Social Media Policy

ASOPRS' policy for the use of photography and social media at the Scientific Symposium is intended to strike a balance between the needs of scientists, physicians and other health care professionals, patients, and advocates for the latest oculofacial plastic surgery information and the needs of presenters to protect their proprietary content from unauthorized use.

- Non-flash photography is allowed for personal, social, or noncommercial use
- Respect presenters who state they do not want their slides and/or content shared on social media
- Attendees taking photos must do so in a non-disruptive manner so as not to disturb the presenter and other attendees
- Slides with patient faces or other identifiable information cannot be shared on social media due to HIPAA regulations
- Video recording, live audio, and/or video streaming is strictly prohibited

Failure to comply with this policy may result in being removed from the session and/or meeting. Please note that photographs and footage will be taken throughout the Scientific Symposium. These may be used by ASOPRS for marketing and publicity in our publications, on our website, in social media, or in any third party publication.

## THANK YOU TO OUR EXHIBITORS

### **| Allergan Aesthetics**

### **| Amgen**

Amgen is committed to unlocking the potential of biology for patients suffering from serious illnesses by discovering, developing, manufacturing and delivering innovative human therapeutics. This approach begins by using tools like advanced human genetics to unravel the complexities of disease and understand the fundamentals of human biology.

### **| BioTissue**

BioTissue is an industry leader in regenerative therapies for ophthalmology, pioneering evidence-based research on the clinical application of human birth tissues for over 40 years. Our amniotic membrane products are recognized for their therapeutic properties in repairing and healing ocular surface wounds. With over 1 million clinical applications, BioTissue's advancements are documented in 420 peer-reviewed publications.

### **| Carrot (formerly Virtual Field)**

Carrot (formerly Virtual Field) is a complete end-to-end visual diagnostic platform designed to modernize how eye care providers perform and manage diagnostic testing. Built for optometrists and ophthalmologists, Carrot delivers clinically validated visual field and functional vision exams through a portable, software-driven platform that improves efficiency, accessibility, and patient experience.

### **| FCI Ophthalmics**

Founded in 1984, FCI is a global leader in developing and manufacturing cutting-edge solutions for dry eye, lacrimal, eyelid, orbital, and cataract conditions. In collaboration with leading surgeons worldwide, FCI pioneers gold-standard devices that set benchmarks for quality, reliability, and innovation. Our portfolio reflects a deep commitment to anticipating clinical needs and advancing patient care. For decades, FCI has been proud to support the ASOPRS community with expertise, innovation, and value—and we extend our sincere gratitude for this enduring partnership in advancing the future of oculoplastic surgery.

## **| Graves' Disease & Thyroid Foundation**

The Graves' Disease and Thyroid Foundation provides help and hope to patients with Graves' disease, thyroid eye disease, Hashimoto's thyroiditis, and other thyroid-related disorders. We provide credible, evidence-based information and support via phone, e-mail, social media, webinars, and online support groups.

## **| Gunther Weiss Scientific Glassblowing Co., Inc.**

GWSG was established in 1963 headquartered in Portland Oregon, USA. GWSG specializes in design, development, manufacturing, and distribution of Tear Duct Glass Tube known as Jones Tube. Jones Tube is a small Pyrex glass tube used in the Conjunctivodacryocystorhinostomy (CDCR) procedure to bypass the lacrimal drainage system when there is a severe obstruction. Jones Tubes are intended to correct watering of the eye when the normal tear ducts become blocked or stop working and cannot be restored adequately any other way. Jones Tubes have been in use since 1963 for Lacrimal Bypass Surgery (CDCR) and other applications. All Tubes made by Gunther Weiss Scientific are hand-made to order. GWSG's tubes have stood the test of time for almost 60 years through working in conjunction with various doctors around the world.

## **| Integrated Orbital Implants, Inc.**

Integrated Orbital Implants, Inc., is the gold standard for orbital implants. It is the only fully integrated natural orbital implant and peg system with 40 years of successful use. This implant is made of hydroxyapatite, the inorganic portion of human bone. It becomes an integrated part of the body, thus making it ideal to accept a motility pegging system. This implant produces the greatest movement for the artificial eye and helps support the weight of the artificial eye.

## **| Kedrion Biopharma**

81% of patients with Plasminogen Deficiency Type 1 develop lesions on one or both eyes as their primary symptom, though lesions can form throughout the body on all organs with mucous membranes. Kedrion relaunched RYPLAZIM®, the first and only FDA-approved treatment for plasminogen deficiency type 1 (PLGD-1), a rare genetic disorder affecting plasminogen production, often resulting in hard fibrous lesions on the moist tissue linings of mucous membranes and various organs. Approximately 500 people in the U.S. are affected by PLGD-1, but the disorder is widely under-diagnosed, according to experts. We are a biopharmaceutical company that collects and fractionates blood plasma to produce and distribute human plasma-derived medicinal products worldwide, used to treat and prevent rare and debilitating diseases and disorders.

## | Matrix Surgical USA

Matrix Surgical USA's flagship product is OMNIPORE, a biocompatible form of porous high-density polyethylene. Our company offers more than 95 unique SKU's of various anatomical configurations and dimensions for reconstruction and augmentation of the craniomaxillofacial skeleton. Our products are available in the United States and throughout the World.

## | OMIC

OMIC is the largest medical professional liability insurer of ophthalmologists in the United States and is the only carrier dedicated specifically to the specialty. Owned and operated by ophthalmologists, OMIC's record of defending ophthalmic claims beats the performance of multispecialty carriers by a wide margin. Visit OMIC's exhibit for more information on programs and upcoming seminars.

## | Poriferous LLC

Poriferous | SU-POR® Implants SU-POR® porous polyethylene implants provide oculoplastic surgeons with a differentiated alternative for orbital reconstruction and enucleation/evisceration procedures, combining intraoperative flexibility with structural reliability. Unlike traditional porous polyethylene implants, which can be more prone to rigidity and fracture during contouring, SU-POR® incorporates proprietary Retained Shape Memory™ (RSM™) technology. This enables controlled bending and shaping with improved resistance to cracking – supporting precise anatomical adaptation without compromising implant integrity. For orbital reconstruction, SU-POR® offers anatomically contoured implants and sterile templating options designed to streamline defect assessment and placement. In contrast to multi-piece constructs often required with other systems, SU-POR® solutions are designed to reduce intraoperative assembly and simplify workflow. Patient-specific implants (PSI) are supported by direct surgeon-to-engineer collaboration, with rapid design turnaround and efficient production timelines – helping avoid delays commonly associated with custom implant workflows. All SU-POR® implants are manufactured, sterilized, and shipped from a single U.S.-based facility, ensuring consistent material performance, quality control, and dependable availability across both routine and complex cases. Experience the difference in the OR. For case support, samples, or PSI collaboration: Poriferous SU-POR® Team | Newnan, Georgia, USA | [US@Poriferous.com](mailto:US@Poriferous.com) | 1-877-631-1954

## **| Rock West Medical**

Rock West Medical provides advanced, medical-grade red light, infrared, and laser therapy devices designed to support pain relief, reduce inflammation, improve circulation, and enhance skin rejuvenation. Our technology is widely used for both therapeutic and aesthetic applications, including recovery, anti-aging, and overall wellness.

## **| Soniquence**

Soniquence provides doctors with unique high-frequency RF SmoothWave technology that allows for precise soft tissue cutting with coagulation while preserving tissue and delicate margins for pathology.

## **| Viridian Therapeutics**

Viridian Therapeutics is developing potential best-in-class medicines for people living with autoimmune and rare diseases, including thyroid eye disease (TED). In TED, Viridian is advancing veligrotug as a differentiated intravenous therapy and elegrobart (VRDN-003) as a potential best-in-class subcutaneous option.
